Software developer with 5 years of experience building modern web applications using Next.js. I've worked on both corporate projects requiring stability and fast-paced startup environments focused on rapid iteration. I'm currently open to new roles and exciting projects where I can contribute, grow, and build high-quality solutions.

PROFESSIONAL EXPERIENCE

Full-stack Developer

Sudolabs
2022 - Present

A completely different vibe: small teams, startup energy, no legacy code, and rapid development. This is where I learned that apps don't have to be perfect—they just need to be good enough to use and improve. Ship early, get feedback, iterate. It changed the way I think about building products.

Software Developer

NESS KDC
2021 - 2022

This was my first role where I genuinely felt like I knew what I was doing. As a JavaScript developer, I joined a team of Java specialists to help migrate their module to React and AWS. It turned into a great learning experience—I earned my AWS Cloud Practitioner certification and later became a tutor for new employees, training them in Terraform and AWS services.

Junior Angular Dev

Koger, Inc.
2020

My first software development role was on a banking project built with Angular and Java. As a new junior dev, I handled small features and bug fixes—and learned a ton in the process.

EDUCATION

Master of Computer Networks

Technical university of Kosice
Faculty of Electrical Engineering and Informatics
2021
Parallel training of neural networks

Bachelor of Computer Networks

Technical university of Kosice
Faculty of Electrical Engineering and Informatics
2019
Processing of medical data using BigData analysis

SKILLS & PROFICIENCIES

- React, Next.js, RSC, SSR
- Prisma, Drizzle, PostgreSQL
- GraphQL, REST

LANGUAGES

- Slovak (Native)
- American English (B2 Certificate)
